Jazba Foundation is a non profit, non partisan & Non Governmental Organization (NGO) which primarily concern to the education and health care issues of the people without any discrimination of religion and casteism. Despite so many sincere work has been done by the Indian governments in past 72 years still there are various sections of the society especially in rural areas are deprived from health care and education. Jazba foundation is a motivational inspiration who stood up against the lack of health care and illiteracy. Every single person who is associated with this amazing initiative feels responsible for a positive change and blessed for serving their voluntary help in humanity. Our vision is to set up primary health care centres in the remotest corners of India. We intend to scale up and establish more centres in the next few years in the most rural areas of Uttar Pradesh especially in Aligarh district. Without the help and support of you people it is not possible to achieve the goal, therefore I humbly appeal to all of you to be a part of this prestigious Foundation and make a positive change.
